

### Autosealer 2600<sup>®</sup> Data Sheet

#### Field of Application (Intended Use)

The HERNON<sup>®</sup> Autosealer 2600<sup>®</sup> dispensing system is a touch-actuated, all-pneumatic applicator for dispensing high-viscosity HERNON<sup>®</sup> products onto threaded pipe fittings and nipples. A quick-turn turret has cavities for 1/16", 1/8", 1/4", 3/8", 1/2", 3/4", and 1" male pipe threads. It is recommended specifically for applying HERNON<sup>®</sup> Pipe Sealants. The Autosealer 2600<sup>®</sup> is fed directly from a 50 ml tube or 850 ml cartridge.

#### Description

A turret head with a cavity for each size of pipe thread is attached to the output of an air actuated, positive-displacement pump. The operator merely presses a fitting down into the correct cavity. The downward motion of the turret depresses a switch that actuates the piston pump causing a metered amount of product to be dispensed. When the fitting is removed, the pump will reset, ready for another cycle.
